# MASTER TRANSCRIPT SUMMARIES
## AND SOURCE-CONTROLLED DEMONSTRATION CLIPS

**People v. Marissa Elaine Keene**

**VEHICULAR HOMICIDE + DUI**

**SYNTHETIC DEMONSTRATION MEDIA - NOT CASE EVIDENCE**

**3 simulated records | 2 audio clips | 1 animated video clip**

*These records demonstrate the source-control workflow only.*

# How to Use This Demonstration Volume

| | |
|---|---|
| **Clip access** | Select the blue OPEN AUDIO CLIP or OPEN VIDEO CLIP control. The adjacent QR code opens the same browser-play clip. |
| **Source timing** | Each entry preserves the synthetic source filename, exact source range, and duration. |
| **Source control** | The MP3 or MP4 controls over every written summary in this demonstration. |
| **Public demo check** | Before seminar use, set Dropbox access to Anyone with the link / Can view. Attendees can then scan and play the clip in a phone browser without the Dropbox app. |

The summaries below imitate the function of suggested-clip information in the established workflow, but they are deliberately synthetic and are not evidence.

## RECORD 01 | DEMO-TC0000001001

| | |
|---|---|
| **Source file** | KEENE_DEMO_AUDIO_01_911_Call.mp3 |
| **Demonstration status** | TRANSCRIPT-STYLE SUMMARY READY WITH 1 SUGGESTED AUDIO CLIP |
| **Media duration** | 18.233 seconds |

### Emergency Call - Collision Location and Immediate Conditions

**Simulated description - not independently verified:** A synthetic 911-style call reports a head-on collision near Auburn Folsom Road and Newcastle Road, identifies children in one vehicle, and reports that one vehicle crossed the center line.

**Demonstration order:** DEMO-TC0000001001
**Source filename:** KEENE_DEMO_AUDIO_01_911_Call.mp3
**Exact source range:** 0.000-18.233 seconds
**Clip duration:** 18.233 seconds
**Source-control note:** This file is synthetic demonstration media. The media controls over the simulated summary; nothing on this card is actual evidence.

**OPEN AUDIO CLIP**

*QR/link note: the QR code and blue control use the same browser-play link. No Dropbox app is required.*

## RECORD 02 | DEMO-TC0000001002

| | |
|---|---|
| **Source file** | KEENE_DEMO_AUDIO_02_Following_Driver_Interview.mp3 |
| **Demonstration status** | TRANSCRIPT-STYLE SUMMARY READY WITH 1 SUGGESTED AUDIO CLIP |
| **Media duration** | 15.438 seconds |

### Following Driver - Pre-Collision Lane Movement

**Simulated description - not independently verified:** A synthetic interview excerpt reports the red Subaru moving toward the center line and then crossing the double yellow shortly before the collision, while expressly declining to say why the movement occurred.

**Demonstration order:** DEMO-TC0000001002
**Source filename:** KEENE_DEMO_AUDIO_02_Following_Driver_Interview.mp3
**Exact source range:** 0.000-15.438 seconds
**Clip duration:** 15.438 seconds
**Source-control note:** This file is synthetic demonstration media. The media controls over the simulated summary; nothing on this card is actual evidence.

**OPEN AUDIO CLIP**

## RECORD 03 | DEMO-TC0000001003

| | |
|---|---|
| **Source file** | KEENE_DEMO_VIDEO_01_Roadway_Sequence.mp4 |
| **Demonstration status** | TRANSCRIPT-STYLE SUMMARY READY WITH 1 SUGGESTED VIDEO CLIP |
| **Media duration** | 14.000 seconds |

### Roadway Sequence - Animated Locator

**Simulated description - not independently verified:** An intentionally simple animated roadway locator demonstrates how indexed video could be linked to a source-controlled excerpt. It is not surveillance footage and is not an accident reconstruction.

**Demonstration order:** DEMO-TC0000001003
**Source filename:** KEENE_DEMO_VIDEO_01_Roadway_Sequence.mp4
**Exact source range:** 0.000-14.000 seconds
**Clip duration:** 14.000 seconds
**Source-control note:** This file is synthetic demonstration media. The media controls over the simulated summary; nothing on this card is actual evidence.
